

Call for Submissions: 15th INFORMS Telecommunications and Network Analytics Conference

March 29th to April 1st 2020, Zuse Institute Berlin

The conference is going to be focused on the theory and application of operations research and management science to problems in telecommunications and network analytics, with particular emphasis on new and emerging technologies.

We invite you to contribute to the 15th INFORMS Telecommunications and Network Analytics conference by organizing a session or tutorial session or a presentation. The topics of interest are:

- Telecommunications modeling, policy and technology;
- Data mining and big data applications in telecommunications;
- Machine learning and artificial intelligence in network analytics;
- Network economics;
- Network design;
- Traffic routing;
- Network optimization;
- Network algorithms and metaheuristics;
- Sensor networks;
- Wireless and broadband networks;
- Vehicle and mobile computing;
- Cloud computing and fog computing;
- Semantic networks;
- Network survivability and reliability;
- Information security and privacy;
- Game theory applications;
- Internet and multimedia;
- Quality of service.

Please check http://informs_tnac2020.zib.de/submissions.html for submission details.

Submission deadline: 15 January 2020

A special issue of the international journal **Networks** (ISSN:1097-0037) on “Telecommunications and Network Analytics” will follow the conference.
